2. In a separate report, mention the changes in the PKS protein expression.
3. The PKS enzymes were identified in samples from treated and non-treated plants.
4. The results indicate a significant decrease in the expression of PKS proteins.
5. Preliminary studies suggest that these changes may be due to the introduction of a new gene.
6. Further research is needed to confirm these findings.
7. The implications of these findings for future research are significant.
